Education

- SIES Graduate School of Technology** Remote / India
B.E. in Artificial Intelligence and Machine Learning (Mumbai University) 2022 – 2026

Technical Skills

- Languages:** Java, Python, JavaScript (ES6+), C++, SQL
- Backend Frameworks:** Spring Boot, Spring Security, Hibernate/JPA, Node.js, Express.js, FastAPI
- Frontend Technologies:** React, Redux Toolkit, Tailwind CSS, TanStack Query, RESTful APIs, WebSockets (Socket.IO)
- Databases & Cloud:** PostgreSQL, MySQL, MongoDB, Supabase
- AI & Machine Learning:** Scikit-learn, TensorFlow, TF-IDF, Cosine Similarity, IBM Watson
- Developer Tools:** Git, Postman, Vite, Maven

Experience

- Web Development Intern – Markscape Pvt. Ltd.** Remote / India
Full Stack Web Development Intern 01 Jan 2025 – 01 Jun 2025
 - UI & Layout Optimization:** Architected mobile-responsive web pages and dynamic CMS layouts, ensuring cross-browser compatibility and consistent visual hierarchy.
 - Performance & UX:** Integrated interactive widgets and customized client-facing components to streamline user navigation, improving overall site performance and accessibility standards.
- AI Intern – CSRBOX (IBM)** Remote / India
Intern – Artificial Intelligence 10 Jun 2024 – 06 Jul 2024
 - Learning-Focused Internship:** Participated in a structured, learning-oriented internship focused on understanding AI concepts and workflows.
 - Hands-On Project:** Developed a chatbot for a website using IBM Watson and other IBM AI tools, applying concepts learned during the internship.

Projects

- ChatFlux – Real-Time One-to-One Messaging App** GitHub | Live Demo
React, Node.js, Express.js, MongoDB, Socket.IO, Tailwind CSS
 - Overview:** Developed a responsive real-time chat application enabling instant one-to-one messaging, live user presence tracking, and secure media sharing.
 - Implementation:** Built event-driven WebSocket communication with Socket.IO, implemented stateless JWT authentication, and structured MongoDB aggregation pipelines.
 - Impact & Optimization:** Indexed MongoDB collections to eliminate N+1 query overhead for unread message counts and integrated Cloudinary for optimized image delivery.
- NoteOrbit – Secure Knowledge Base Platform** GitHub | Live Demo
React, Java, Spring Boot, Spring Security, Hibernate/JPA, MySQL, Tailwind CSS
 - Overview:** Built an enterprise-grade personal knowledge base featuring hierarchical folder organization, multi-tag filtering, and keyword search.
 - Implementation:** Architected a decoupled multi-tier system with Spring Boot 3, React 19, Spring Security stateless JWTs, and Jakarta bean validation.
 - Impact & Optimization:** Eliminated N+1 query bottlenecks via JPA Entity Graphs and implemented transactional cascades to ensure relational data integrity.
- TasteFlicks – Movie Discovery & Recommendation Platform** GitHub | Live Demo
React, FastAPI, Python, Scikit-learn, Supabase, TanStack Query
 - Overview:** Created a full-stack movie discovery web app that provides tailored film recommendations based on user preferences and movie metadata.
 - Implementation:** Engineered a content-based recommendation system using TF-IDF and cosine similarity, exposed via FastAPI and integrated with a React frontend.
 - Impact & Optimization:** Integrated TMDB API with TanStack Query caching to minimize duplicate network requests and provide fast, responsive browsing.

Achievements

- 2nd Rank – SIES GST Cognition 2024:** Built an agricultural machinery rental web interface connecting farmers with equipment owners.
- 2nd Rank – SIES GST Cognition 2023:** Developed a dynamic multiplayer Wordle web application in Java featuring real-time interactive game logic.

Certifications

- Artificial Intelligence Fundamentals** – IBM SkillsBuild (Credly) | *Topics: Computer Vision, Natural Language Processing*
- Getting Started with Artificial Intelligence** – IBM SkillsBuild (Credly) | *Topics: Generative AI, Supervised Learning*
