EDUCATION

- **SIES Graduate School of Technology** Nerul, Navi Mumbai
B.E. in Artificial Intelligence and Machine Learning (Affiliated to Mumbai University) 2022 – 2026

EXPERIENCE

- **AI Intern - CSRBOX (in association with IBM)** Remote / India
Intern – Artificial Intelligence 10 Jun 2024 – 06 Jul 2024
 - **Learning Focus:** Participated in a structured curriculum focused on core AI concepts and operational workflows.
 - **Hands-On Project:** Developed an interactive website chatbot using IBM Watson assistant and associated enterprise AI toolsets.
- **Web Development Intern - Markscape Pvt. Ltd.** Remote / India
Intern – Web Development 01 Jan 2025 – 01 Jun 2025
 - **Website Development:** Built and customized dynamic web portals leveraging WordPress and automated CMS workflows.
 - **Functionality Enhancement:** Structured responsive page layouts, integrated custom plugins, and optimized core user experience.

PROJECTS

- **ProcureWatch**
 - **Blockchain Architecture:** Developed a permissioned public procurement system using Hyperledger Fabric and Docker to ensure traceability and accountability in government contract allocations.
 - **Smart Contracts:** Authored secure chaincode using Node.js to handle procurement logic, automate tamper-proof vendor bid evaluation, and enforce cryptographic security parameters.
 - **Dashboard Integration:** Integrated a responsive React.js frontend with the blockchain via Fabric SDK, building distinct role-based dashboards for Government, Vendors, Auditors, and Citizens.
 - **Links:** GitHub
- **Hotel Review Sentiment Classifier**
 - **Ensemble Learning:** Developed an NLP pipeline using an ensemble Voting Classifier aggregating predictions from 4 distinct Naive Bayes architectures to optimize classification accuracy.
 - **Data Preparation & Engineering:** Executed end-to-end data preparation using regular expressions for text cleaning and extracted high-dimensional features combining BoW and N-gram representations via SciPy.
 - **Analytics Deployment:** Built a Flask REST API to serve real-time model inference, generating tabular prediction reports and data visualizations of confidence probabilities for end-users.
 - **Links:** GitHub
- **TasteFlicks**
 - **Data Analysis & Insights:** Analyzed viewer history datasets to extract trend metrics, converting raw user data into custom analytics dashboards and personalized behavioral insights.
 - **User Analytics & Tracking:** Developed an intuitive tracking system and watchlist manager enabling users to log viewing history, calculate cumulative watch hours, and visualize personal top-performing genre distributions.
 - **Links:** Figma GitHub Live Demo

CERTIFICATIONS

- **Getting Started with AI – IBM SkillsBuild**
View Certificate
- **AI Fundamentals – IBM SkillsBuild**
View Certificate

ACHIEVEMENTS

- **2nd Place – SIES GST Cognition 2023**
Project presentation competition evaluated by industry judges based on innovation and execution quality.
- **2nd Place – SIES GST Cognition 2024**
Project presentation competition judged by external experts assessing technical depth and impact.

SKILLS

- **Programming Foundations:** Python, Java, C++, Data Structures & Algorithms
- **Languages & Frameworks:** HTML5, CSS3, JavaScript (ES6+), React, TailwindCSS, Node.js
- **Databases & Analytics:** SQL (PostgreSQL), Power BI, Tableau
- **Design & Tools:** Figma, Git/GitHub, WordPress, Docker
